NZ Epiphyte Survey Programme

Field Survey Sheet

email: nzepiphytenetwork@gmail.com

Location: Tree Number: | Photo numbers:

Date:

Surveyors name(s):

GPS coordinates:

Vegetation type*: **list the most dominant species*

Vegetation density: Light — can see a person **more than 40 strides** away | Moderate — can see a person **up to 40 strides** away | Dense — can see a person **up to 20 strides** away

Landform: Ridge Face Gully Terrace Other:

Host tree species:

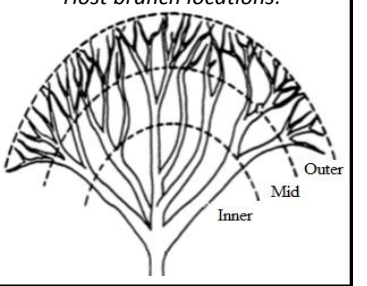
Host tree bark type: Smooth (e.g. tawa) Scaly (e.g. miro) Peeling (e.g. rimu) Fibrous (e.g. tree fern) Bumpy (e.g. cabbage tree)

Host tree diameter/circumference (cm)*: **measure at 1.35m from ground*

Host tree height (m): 5-10 10-15 15-20 20-25 25-30 30+

Approx. distance from forest edge (m): 0-25 25-50 50-100 100+

Host branch locations:



Epiphyte/vine/mistletoe species	**Indicate % cover in each height zone:** Choose from: <5, 5-25, 25-50, 50-75, or >75% — **Height zone:** 0-10 metres	10-20 metres	20 + metres	**Predominant Location** (Trunk, Inner Branch, Mid Branch, Outer Branch):	Notes:
e.g. *Pyrrosia eleagnifolia*	*<5*	*<5*	*5-25*	*Trunk*	
					e.g. *heavy insect browse*
